## PRODUCTION

## ABOUT US

Rota Casting Metal Construction Automotive Industry and Trade Limited Company, which has determined to make production above the world quality standards, was established in 2012. After the necessary branding investments, it has become a well-known brand in its sector with its quality and after-sales services in a short time. Combining production technology with its experience, Rota delivers long-lasting high quality products to all over the world today. Continuing its market researches with its experienced team, Rota works without stopping to meet the demands and expectations of its customers both in domestic and foreign markets. Specialized in Steel Casting, Rota produces high quality Ground Engaging Tools (G.E.T.) like Bucket Teeth, Adaptors, Blades, Rippers etc. under the ISO 9001:2015 standards.

In today's world where technology is advancing rapidly in every field, it integrates production technologies and techniques with the most up-to-date form into every stage of product production. The product that comes out as a result of the production flow that we combine with experience and innovative technology is carefully examined and reaches you after the quality control stages are meticulously done.

Rota continues its investments in order to achieve its growth targets with stable and solid steps, and provides the most accurate solutions for the increasing demands of domestic and foreign customers.

## QUALITY CERTIFICATES

### CATERPILLAR
